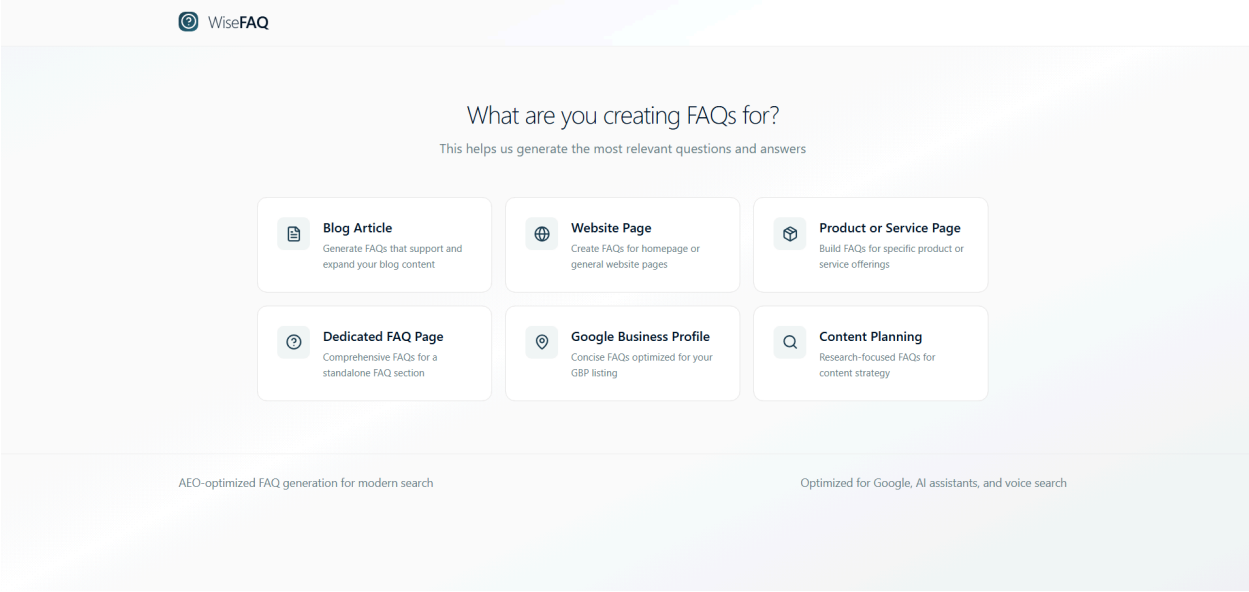
WisePilot AEO Toolkit
One Page Quick Start Guide

This page shows you exactly **what to do, in what order, and which tool to use at each step**.

Step 1: Create AEO Optimized FAQs

You will use WiseFAQ for this.

- Generate FAQs based on real, commonly asked questions.
- Each question includes a clear, direct answer written for AI understanding.



Step 2: Order FAQs by Demand

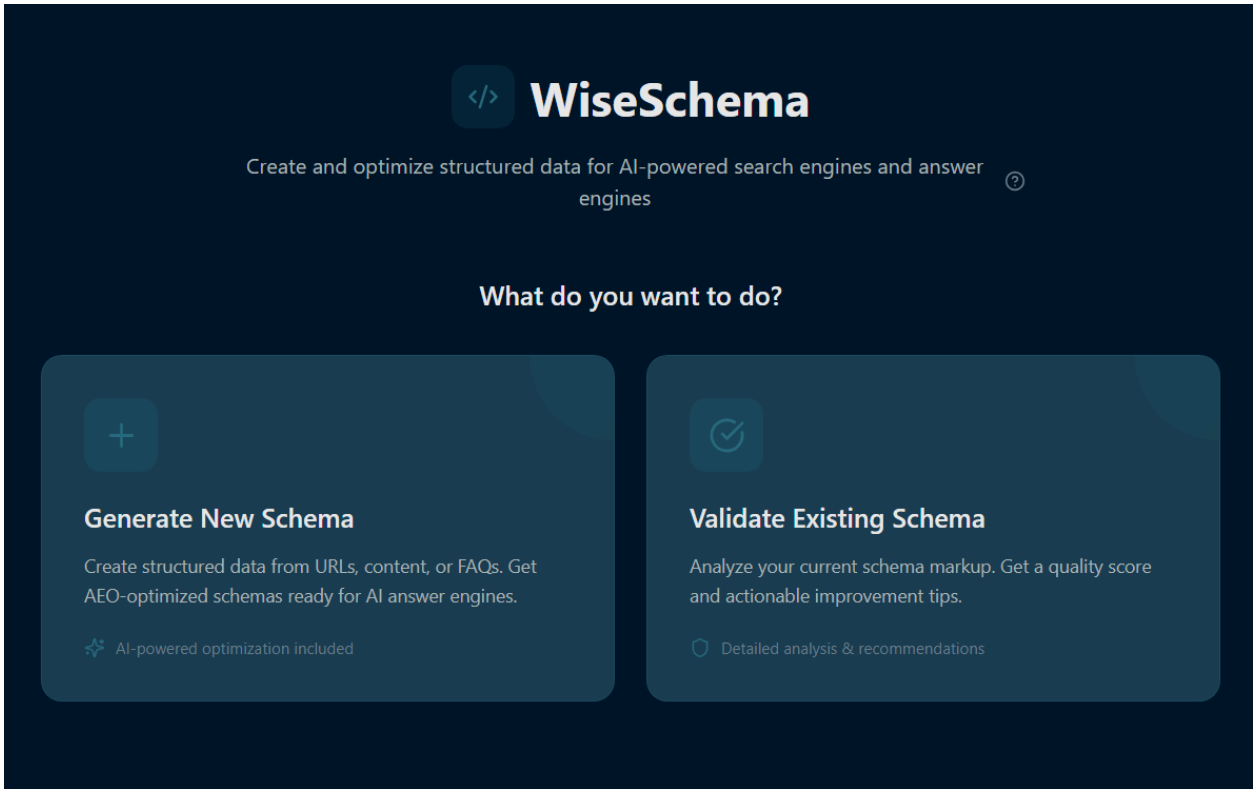
WiseFAQ does this automatically.

- FAQs are ordered from most commonly asked to least commonly asked.
- This order becomes your AEO optimized content roadmap.
- Do not change the order.

Step 3: Generate Schema Markup

You will use WiseSchema for this.

- Copy your FAQs from WiseFAQ.
- Paste them into WiseSchema.
- Generate FAQ schema markup aligned to page intent.



Step 4: Publish FAQs on Your Website

- Add the AEO optimized FAQs to the appropriate page on your site.
- Add the schema markup generated by WiseSchema.
- Make sure answers are visible and not hidden behind tabs or accordions.

Step 5: Turn the Top FAQ into an AEO Optimized Blog Article

You will use WiseBlog for this.

- Take the question at the top of your FAQ list.
- Generate an AEO optimized blog article using WiseBlog.
- The AEO generated article will include:
    - The question in the title
    - A direct answer at the top
    - Structured content throughout
    - FAQs
    - Schema markup
    - Meta title and meta description

Step 6: Publish the Blog Article

- Publish the article on your website.
- Add the meta data provided by WiseBlog.
- Add the schema markup provided by WiseBlog.
- Internally link back to the related question on the FAQ page.

Step 7: Repeat Using the Same Order

- Return to your FAQ list.
- Take the next question.
- Generate a new blog article using WiseBlog.
- Publish.
- Continue moving down the list in order.

Do not skip questions.
Do not publish out of sequence.

Best Tips and Practices

Consistency over quantity
AI trust compounds when answers are reinforced over time. Sporadic publishing breaks the loop.

Our recommendation
One new AEO optimized blog article every two weeks.

Quality over everything else
These tools generate AEO optimized content, but you are responsible for accuracy.
Always review content before publishing. AI can make mistakes.

A Final Note

You did not buy a static toolkit. You joined an evolving system.

New tools and resources will be added over time to strengthen the AEO Loop.

If you experience issues with existing tools, have ideas for meaningful improvements, or see gaps that should be filled, then please do not hesitate to reach out to us directly: **hello@wisepilotai.com.**

We are building this toolkit together.
